Econometrics: Nature and meaning; Difference between Mathematical economics, Statistics and Econometrics. History of Econometrics. Types of Data: Time series, Cross SECTION-And Panel Data.

Simple linear regression model (Two variables): Sources of disturbance terms, assumptions,.

SECTION-B

Estimators and Estimation, Least squares estimators and their properties

Gauss-Markov's theorem for Simple linear regression model; testing significance of regression coefficients, concepts of R² and Adjusted R².

SECTION-C

Multiple Regression Analysis: Meaning and Assumptions.

Estimation of Semi-log and double-log functions.

Analysis of variance approach (ANOVA) Concept and basic Applications.

Chow's test.

SECTION-D

Multicollinearity, Autocorrelation and Heteroscedasticity : Meaning, Nature, consequences, tests and remedies.

Time: 3 Hours

Marks: 100

Credits: 4 - 0 - 0

60 Hrs.

Instructions for the Paper Setters:-

Eight questions of equal marks (Specified in the syllabus) are to be set, two in each of the four Sections (A-D). Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

SECTION-A

Introduction to Research: Meaning, purpose, significance of research, Research methods versus methodology, Research process.

Formulating a research problem: Selecting the problem, necessity of defining a problem, steps in the formulation of a research problem and objectives.

SECTION-B

Research Design: Exploratory, Descriptive and Experimental Research Design.

Literature review and critical thinking: The scope and importance of a literature review, types of literature review, procedure for reviewing the literature, review the selected literature. Documentation and referencing.

SECTION-C

Identification of variables: Types of variables from the point of view of causation, study design and unit of measurement. Types of measurement scale: nominal, ordinal, interval and ratio scale.

Sampling Design: Steps in Sampling Design; Probability and Non – Probability Sampling Methods. Sample size determination.

SECTION-D

Ethical issues in social science research: Principles of ethically acceptable research, Codes of ethics, rules of a good scientific practice.

Research writing: Characteristics of a good research paper. Planning and preparing a final research report, Structure of the report. Presenting the report.
